

## DADDY PETE'S NURSERY BLEND

Daddy Pete's Nursery Blend is the same product used by many professional wholesale growers in the Carolina's who are growing woody ornamentals, evergreens, roses, perennials, and mums. It is a heavier mix than our potting mix and it consists of premium aged pine bark fines, Daddy Pete's Composted Cow Manure, perlite, and dolomitic lime. This is the product to use for all outdoor containers, large patio pots, and bedding plants.

This organic blend can be used indoors and outdoors as a regular mix for various types of plants, and this combination of materials will hold moisture well.
